

RICS Home Surveys Information Sheet

Helping you choose the right survey

1

Why do you need an RICS Home Survey? Because forewarned is forearmed. Choosing the right survey will help highlight any serious problems and advise you of the specific risks before you commit to the process of buying or selling a property.

RICS has three different types of survey (outlined overleaf). These can only be conducted by qualified surveyors. Reliable and cost effective, these reports carry the full weight of the Royal Institution of Chartered Surveyors – the industry's most respected authority on surveying.

Buying a home

It's important to remember that your mortgage lender's valuation report is not a survey. It merely tells your lender whether or not the property is reasonable security for your

loan. An RICS survey will tell you the actual condition of the property. That's vital information that can be invaluable during price negotiations, and will also help you avoid expensive surprises after you've moved in.

Selling a home

An RICS home survey can help you prepare for selling your property. It will show you any problems that may delay your sale or cause price reductions later in the process.

Staying at home

A survey of the current condition of your home will warn you of defects and help you avoid escalating repair and maintenance costs in the future. It will also be extremely useful if you're thinking of remortgaging.

The collage displays various sections of a RICS Home Survey report. The 'Overall opinion and summary of the condition ratings' section shows a '3' rating and a reasonable proposition for purchase at £135,000. The 'Outside the property' section lists issues like rainwater pipes, roof structure, and windows. The 'Valuation' section shows a market value of £124,000. The 'What to do now' section provides detailed advice on repairs and further investigations.

Buying or selling? Survey your options

The RICS Condition Report

Choose this report if you're buying or selling a conventional house, flat or bungalow built from common building materials and in reasonable condition. It focuses purely on the condition of the property by setting out the following:

- clear 'traffic light' ratings of the condition of different parts of the building, services, garage and outbuildings, showing problems that require varying degrees of attention;
- a summary of the risks to the condition of the building; and
- other matters including guarantees, planning and building control issues for your legal advisers.

An RICS Condition Report does not include a valuation, but your surveyor may be able to provide this as a separate extra service.

Ask your surveyor for a detailed 'Description of the RICS Condition Report Service' leaflet.

The RICS HomeBuyer Report

Choose this report if you would like more extensive information whilst buying or selling a conventional house, flat or bungalow, built from common building materials and in reasonable condition. It costs more than the Condition Report but includes:

- all of the features in the Condition Report plus a more extensive inspection;
- the surveyor's professional opinion on the 'Market Value' of the property;
- an insurance reinstatement figure for the property;
- a list of problems that the surveyor considers may affect the value of the property;
- advice on repairs and ongoing maintenance;

- issues that need to be investigated to prevent serious damage or dangerous conditions;
- legal issues that need to be addressed before completing your conveyancing; and
- information on location, local environment and the recorded energy efficiency (where available).

Ask your surveyor for a detailed 'Description of the RICS Homebuyer Service' leaflet.

The building survey

Formerly called a structural survey, you could choose the building survey if you're dealing with a large, older or run-down property, a building that is unusual or altered, or if you're planning major works. It costs more than the other RICS reports because it gives detailed information about the structure and fabric of the property. It includes:

- a thorough inspection and detailed report on a wider range of issues;
- a description of visible defects and potential problems caused by hidden flaws;
- an outline of repair options and the likely consequences of inactivity; and
- advice for your legal advisers and details of serious risks and dangerous conditions.

A building survey does not include a valuation, but your surveyor may be able to provide this as a separate extra service.

At-a-glance survey comparisons

This table will help you choose the most appropriate survey, but if you have any particular requirements, remember to discuss them with your surveyor before the inspection of the property. The surveyor may be able to provide you with extra services, under separate contracts.

Service features	RICS Condition Report Service	RICS HomeBuyer Service	Building survey
Describes the construction and condition of the property on the date of the inspection.	✓	✓	✓
Aims to identify any problems that need urgent attention or are serious.	✓	✓	✓
Aims to identify things that need to be investigated further to prevent serious damage.	✓	✓	✓
Aims to tell you about problems that may be hazardous.	✓	✓	✓
